BACKLOG: Epic/Feature/Story

Labels:

Nur was refined

View 1View 5+ New view

Item Type	Status	↑	Title	Labels	Assignees	Milestone
1 Feature	Planned		• Login with AM account	Epic 1: Login		Epic 1 Login
2 Story	Planned		• Login with AM account	Feature 1.1 Login with AM Account		Epic 1 Login
3 Story	Refined		• Login with Facebook account	Feature 1.2 Login with ext. identities		Epic 1 Login
4 Feature	Now		• Login with External identities	Epic 1: Login		Epic 1 Login
5 Story	Now		• Login with Google account	Feature 1.2 Login with ext. identities		Epic 1 Login
6 Story	Passed		✓ Log back	Feature 1.1 Login with AM Account		Epic 1 Login
7 Story			• Create AM account	Feature 1.1 Login with AM Account		Epic 1 Login

+Status:

Status:

«Planned» = war noch in keinem Sprint aber kommt noch (muss aber zuerst refined werden)

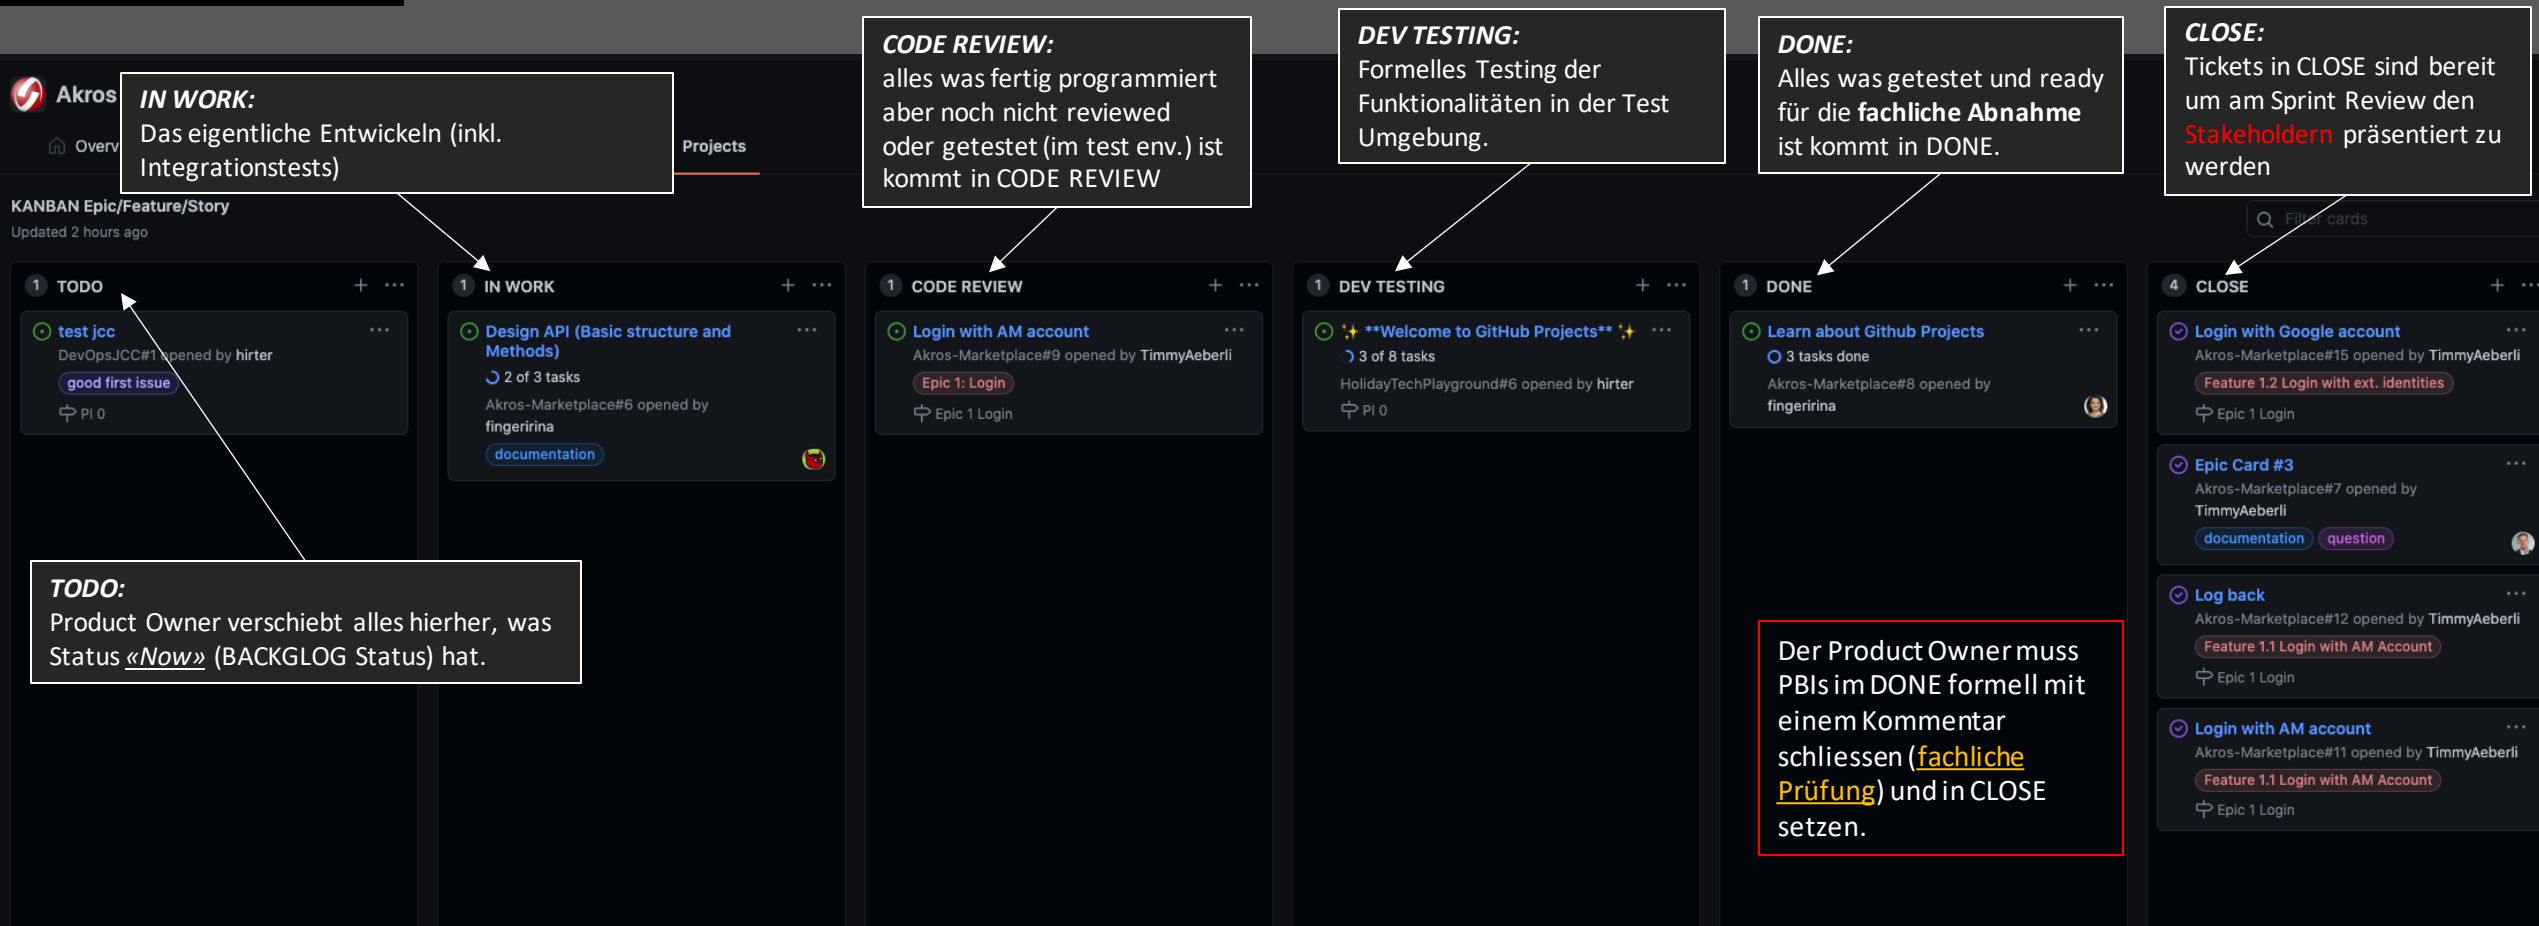

«Refined» = wurde refined und ist bereit für den Sprint

«Now» = ist im aktuellen Sprint (wird im Planning gemeinsam entschieden)

«Passed» = wurde im Review von den Stakeholdern abgenommen und muss geschlossen sein

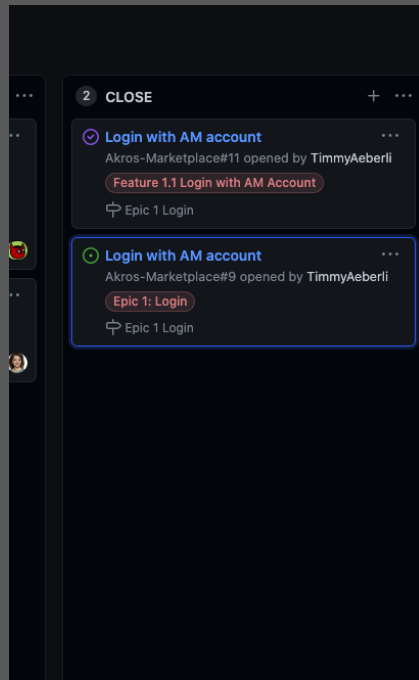

KANBAN Sprint Progress

As the Product Owner I think this Feature is totally and utterly completely implemented.

The Story is well satisfied.

Abschluss durch PO (close with comment):

Der Product Owner muss vor dem Sprint Review die Product Backlog Items in der Kanban Spalte DONE einzeln durchgehen, mit den Devs Rücksprache nehmen, falls etwas nicht klar ist und die PBIs mit einem Kommentar formell schliessen. Damit ist das PBI dann bereit für das Sprint Review mit den Stakeholdern.

Cleaning the KANBAN Board

[Link zum Beispielticket](#)

Nach der Präsentation der Ergebnisse gegenüber den Stakeholdern werden die PBIs aus dem aktuellen KANBAN genommen.
